

## COMPOSITE LAMINATE CIRCUIT STRUCTURE AND METHODS OF FABRICATING

### ABSTRACT OF DISCLOSURE

5  
10  
A laminate circuit structure assembly is provided that comprises at least two modularized circuitized voltage plane subassemblies; optionally an interposer located between each of the subassemblies and wherein the subassemblies and interposer, if present, are bonded together with a cured dielectric coating. The interposer comprises dielectric layers disposed about an internal electrically conductive layer.
